Transformer Enclosures

We are suppliers of a wide range of Transformer Enclosures for cast-resin transformers to suit most requirements. When one of our standard units is unsuitable we will of course design a unit specifically for your requirements.

As switchgear builders and installers ourselves, we understand your requirements including the design features and installation features you value most. We always provide you with 3D CAD drawings of every unit as well as the ventilation calculations so you know exactly what you are getting.

We are able to provide:

- Standard Enclosures
- Bespoke Enclosures
- LV copperwork
- LV Cable Box
- HV cable Box
- Fully detailed 3D drawings prior to manufacture
- Flat-pack delivery
- Fully assembled delivery
- Packages including the transformer itself
- Site installation services
- Site testing / commissioning
- Paint finish to match your equipment
- Temperature protection controls
- Fan controls
- Transformer maintenance
- Associated HV & LV switchgear
